

Take back control of your spray booth!

FLEX filter life extender

SYSTEM

The industry's first true wireless, high-capacity, flexible filtration system.

FLEX™ delivers up to 15 times more life than traditional filter pads

Savvy sprayers know that no two spraying applications are alike and that when filters are full, they're full... **You have to change them.** Doesn't matter whether it's the middle of the night, middle of a shift or just a couple of hours from the weekend...**filters tell YOU when to shut down.**

Well, no more! Whether you choose a full set of ESP (Extended Surface Pads) for maximum production time between filter changes, or a mixture of ESP and standard pads to target a specific change-out schedule... **CONTROL IS NOW YOURS!**

With triple the media of traditional pads and the real world proven capability of Paint Pockets® exclusive, patented, Diamond Pockets Technology™ (delivering 3-5 times more holding capacity per square foot of media)...

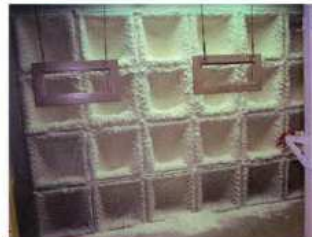

FLEX with ESP lets you finish up to 15 times more product between filter changes yet mixes and matches with pads to meet your scheduling needs.

FLEX CELL™ Grid (empty)

FLEX ESP's (clean)

FLEX ESP's (loaded)

FLEX reduces hot spots

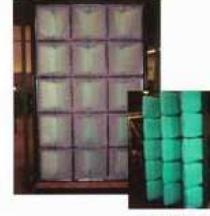

Strategic placement virtually eliminates hot spots where sprayed buildup is a problem. Use **FLEX ESP** where you need them most, maximizing spray time while minimizing wasted time changing filters.

FLEX uses ESP to **I-M-P-R-O-V-E** your finishing/spraying department

Improve Air Flow

Maximize production time between filter changes

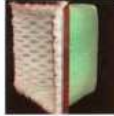

Prevent excessive filter change-out costs

Reduce cost of partially used filter media

Organize filter changes to match your schedule

Virtually no filter bypass (Uses patented ZIPPER™ mounting channels)

Engineer these advantages for each finish type
